Gentlemen:

As a proud member of the *American Anti-Vivisection Society*, I would just like to personally extend my thanks to your agency for accepting all of their proposed rejections of the rabbit patent, Patent #6,924,413. I am a great animal lover but rabbits will always be my first love. You can't imagine how important any changes such as this mean to us everyday animal lovers.

The protection in all forms of rabbits is much appreciated for these helpless, defenseless animals who are sought after as prey. Please keep up the good work. It does not go unnoticed!

I would also like to voice my opposition of issuing patents on ANY animals and sincerely hope the USPTO will change their policies in the future. Animals are in a sense human beings as most of us treat them as one of us.

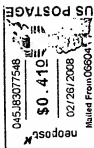

I'm sure the kindness and thoughtfulness that USPTO reflects on animals will be greatly rewarded.

Sincerely yours,

Susan Ziko
